<p>701 Locust Street, Cambridge is a superb Queen Anne style dwelling with the entrance facade composed of two elements. On the south west side is a gable, at right angles to the actual entrance area. Centered on the gable is a half circular tower, reminiscent of a bay, which extends to a third story before it is capped, above the apex of the main roof, with a cornical roof. The lower story is wider than the upper two, and is seperated by a small concave shingle roof. Between the second and third stories is a panel of bas-relief plasterwork, a decorative device also used in the smaller tower above the other part of the house, and in the pediment above the steps onto the porch. There is a one story porch on the north west side of the building and on the southwest and southeast sides. It has handsome fluted column and plain balustrade, and no brackets.</p> <p>The Mill Street side of the dwelling is similar in general composition, but another form of decoration is employed. Beneath the "A" roof gable is a rectangular bay on both floors, the upper bay being flanked by tiny porches and the apex having a small porch enclosed beneath the roof. On the far end of the house protruding from the roof, is a lance dormer similar to the small porch on the aforementioned gable.</p>

701 LOCUST STREET

Built for Henry Lloyd, who was Governor of Maryland between 1886 and 1888, this is one of the largest and most elaborate examples of Queen Anne style architecture in Cambridge. It was designed by J. Benjamin Brown. Of frame construction and two and one-half stories high, there are two third story towers on the L shaped front facade. These towers are ornamented by a molded plaster frieze. There is a porch across the front supported by fluted Doric columns, with a ornamented pediment in front of the door. On the southeast corner of the front is a small recessed balcony.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Built in the Queen Anne style, this is a large assymetrical two and one half story frame house. On the front facade are two bays, plus a gabled wing projecting toward the street. On the front of this wing is a bay window on the first and second stories that rises to a round third story tower. Between the first and second story of the tower is a shingled roof, and between the second and third story of the tower is a horizontal plaster band with a molded floral motif. Across the two bays to the east of this, is a one story porch supported by fluted Doric columns with a plain ballustrade between. In front of the door, which is flanked by sidelights and has a transom light above, is a gabled pediment. To the east of the door is a semi-circular bay window on the second story and a round third story tower above. This tower is smaller than the one on the front of the gabled wing. It also has a horizontal plaster band with ornamentation. On the southeast corner is a small balcony, in front of a recessed bay, supported by a corner post and brackets with pierced ornamentation. This balcony is enclosed by a ballustrade. On the west side of the house is a one story screened porch, also supported by Doric columns with a ballustrade.

Annapolis, Maryland 21401
(301) 267-1438

701 Locust Street

This large mansion, also known as Camelot Hall, was built in 1876-77 by Governor Henry Lloyd (1852-1920). Lloyd was related to the Lloyd family of Wye House in Talbot County. His paternal grandfather, Edward Lloyd, served as governor from 1809 to 1811, and his mother claimed descent from John Henry, United States Senator and Governor of Maryland in the 1790's. Henry Lloyd was a teacher, lawyer, and from 1875 to 1881 auditor of the county court. In 1881 he entered the State Senate and served as president of that body. Upon the resignation of Governor Robert M. McLane in 1885, Lloyd succeeded to the statehouse, serving until 1889. He returned to Cambridge where he became president of the Dorchester National Bank. From 1892 until 1908 he was associate judge of the Circuit Court. This house remained in the Lloyd family until 1954.

This residence is one of the more ornate examples of Queen Anne style architecture in Cambridge. Lloyd was a man of wealth and influence, to which the house bears eloquent testimony. The architect was J. Benjamin Brown, who designed many buildings in the late nineteenth and early twentieth century in Cambridge.
